

# What's new in the Infor Xi platform

## Rise to a new level of software sophistication

Success in the digital business era requires a coherent, coordinated effort across your entire enterprise. It's nearly impossible to accomplish that with an assortment of disparate, disconnected technologies. You need to get beyond the habit of reconciling data from multiple silos through an ad hoc assortment of spreadsheets, if you want to stay competitive. With a fully connected technology platform that handles integration, analysis, and collaboration, you can apply enterprise-wide focus to the challenges of your industry.

## Take advantage of Infor expertise

The Infor® Xi technology platform gives you unparalleled capabilities for integrating and extending the applications that make your business successful. By giving you a single unified platform, with a cutting edge user experience and unmatched analytical capabilities, Infor Xi makes it easier for you to tailor and expand your technology infrastructure to meet the needs of your business. It also helps users feel as instantly familiar with your software as they do with their favorite online shopping and social media platforms. With Infor Xi, you'll be ready to deal with the coming wave of digital transformation and stay successful, in spite of new challenges.

Enhance the value of your Infor solutions with Infor Xi technology.

## Get a platform for success

The Infor Xi platform gives your company the perfect platform for growth—a unified, highly integrated technology framework that preserves your freedom to choose, configure, and target business-specific solutions to your exact needs

### Advance to more innovative technology

The technologies within the Infor Xi platform were designed to cover the widest possible range of emerging business needs. Those technologies include:

- **Infor ION®**—The newest version of Infor ION integration technology, built on HTML5, gives you better performance, richer search capabilities, and easier integration than ever before. Its newly enhanced graphical mapper gives you a clearer, more intuitive tool for building process flows.
- **Infor ION API**—By giving you richer, more varied paths for gaining programmatic access to data, the Infor ION API extends the power and value of your Infor solutions in new ways. You'll gain the potential for more powerful mobile capabilities, better access to analysis, and the ability to give third party solutions access to data from your Infor solutions.
- **Infor Ming.le™**—Our groundbreaking collaboration and business process management technology now features extraordinary Hook & Loop user experience design and workflow automation capabilities to help you be more productive anytime, anywhere.
- **Infor Document Management**—Infor Document Management now offers unmatched simplicity and ease of use for all your document management needs. By giving you a single document management interface to serve all your Infor solutions, you can easily find, manage, and generate value from the information you accumulate.

- **Infor Business Intelligence**—You'll gain better productivity and a rich, intuitive user experience with Infor Business Intelligence for the Infor Xi platform. Because business intelligence is woven deeply into core Infor Xi technology, your BI content and data insights will become a seamless part of your business workflow and collaboration process.

Other Infor Xi supporting technologies that help deliver great performance include:

- **Infor ION Business Vault**—The Infor ION Business Vault dramatically accelerates reporting and analytics by moving critical background functions onto a separate, dedicated resource, making it unnecessary to wait overnight for analysis of critical business data. With Infor Xi technology, Infor ION Business Vault draws on rich data connections between many different types of data systems. It can rapidly reveal issues affecting different parts of your business that you might not otherwise recognize.
- **Infor Federated Services**—Infor Xi technology improves the performance of federated services and makes it greatly easier for you to manage new users, give access to applications, and integrate application functions across your enterprise.
- **Hook & Loop™ UX** – The newest version of Infor Xi features our advanced Hook & Loop user experience, designed to be more meaningful, pleasurable, convenient, usable, reliable and functional. The Infor user experience will change what you expect from business software.

## Move to a consistent, unified technology experience

You can rapidly enhance the value of all your Infor solutions with the support of the newest version of the Infor Xi platform. With easier integration, single sign-on, and improved user management, you'll gain a fully integrated technology experience that can translate into better performance throughout your organization.

### Benefits:

- Easier integration
- More extensive single sign on
- Better user management
- Simpler maintenance
